## DETAILED ACTION

### *Specification*

The abstract of the disclosure is objected to because the abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Correction is suggested. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. Each of the claims is an omnibus type claim.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, as best and presently understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Pace (4284078).

The Pace reference discloses a water hygiene dispenser. The dispenser is used to rinse and clean vaginal and anal cavities. The dispenser is used to relief or aid constipation, vaginal infection or irritation.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Daugherty, Arzonico and Barry were cited to show a personal hygiene cleaning apparatus for connecting to either a showerhead or a faucet. Moon was cited to show a hygienic device for enema, douche or colonic irrigation.
